Education

University School of Automation and Robotics (GGSIPU) **Expected July. 2027**
B.Tech in Industrial Internet of Things | GPA: 8.83/10 *New Delhi, India*

Bal Mandir Sr. Sec. School **2022**
CBSE Class XII | 92.6% *Delhi, India*

Experience

RARS Innoventa Private Limited **June 2026 – Present**
Software Development Intern *Delhi, India*

- Developed **scalable** backend services and responsive React components for a multi-vendor B2B marketplace, enabling product management, inventory tracking, and order workflows.
- Built an end-to-end community platform with automated user onboarding, event **RSVP management**, and **secure payment gateway integration**.
- Designed, developed, tested, and deployed full-stack features using **React, Node.js, Express.js, and PostgreSQL** while collaborating with senior engineers.

Projects

ATS Workplace – AI-Powered Recruitment Suite | *React, Node.js, Python, FastAPI, PostgreSQL* | Live Demo | GitHub

- Architected a **microservice-based ATS** featuring a React frontend, a Node.js API gateway, and a Python-based ML engine to automate high-volume recruitment workflows.
- Developed a high-performance **NLP pipeline** using FastAPI, SpaCy, and Hugging Face Transformers for real-time candidate analysis and **semantic resume scoring**.
- Engineered an **automated screening system** that generates AI-driven candidate summaries and ranking metrics, significantly reducing manual review time.

Business 4.0 – Community Meetup Platform | *React, Node.js, Express, PostgreSQL, Cloudinary* | Live Demo | GitHub

- Built a full-stack platform where members can sign up, log in, and **RSVP to events**, using JWT authentication with a separate admin role for organisers.
- Created an admin panel to add, edit, and cancel events and upload images, with photos stored on **Cloudinary** and event data in **PostgreSQL**.
- Added an **RSVP flow with UPI payment** - users scan a QR code, upload a payment screenshot, and the event's attendee count updates automatically.

SafarSaathi – Cab Booking Application | *React, Node.js, Express, PostgreSQL, Twilio, Nodemailer* | Live Demo | GitHub

- Implemented a **multi-tier RBAC system** managing distinct authentication flows for Admins, Drivers, and Customers via JWT.
- Developed a comprehensive **Admin Dashboard** for revenue tracking and a **fleet management system** with real-time driver assignment and automated WhatsApp confirmations.
- Integrated **Razorpay** for secure payment processing and built a complete **driver onboarding workflow**, streamlining the end-to-end booking lifecycle.

Technical Skills

Languages: JavaScript (ES6+), C/C++, SQL, Python, Java

Front-End: React.js, Next.js, Tailwind CSS, Redux

Back-End: Node.js, Express.js

Databases: MongoDB, PostgreSQL, MySQL

Tools & Platforms: GitHub, Postman, Vercel, NeonDB, Supabase, Git

Achievements & Certifications

Smart India Hackathon (SIH) - Cleared Round 1 of the national-level innovation hackathon

Samsung Innovation Campus Certificate - Completed professional training and certification in Artifical Intelligence

Google Cloud GenAI: Prompt Engineering - Google Cloud Skills Boost
